Natural Disaster Hotspots Case Studies Margaret Arnold,2006-01-01 These case studies complement the earlier groundbreaking work of *Natural Disaster Hotspots: A Global Risk Analysis* published in April 2005. Three case studies address specific hazards: landslides, storm surges and drought. An additional, three case studies address regional multi-hazard situations in Sri Lanka, the Tana River basin in Kenya, and the city of Caracas, Venezuela.

Nourishing millions: Stories of change in nutrition: Synopsis Yosef, Sivan,Pandya-Lorch, Rajul,2016-06-29 In recent years, the world has seen unprecedented attention and political commitment to addressing malnutrition. Milestones such as the Scaling Up Nutrition (SUN) Movement, the Lancet Maternal and Child Nutrition Series, and the Second International Conference on Nutrition (ICN2) have marked the rapid rise of nutrition on the global policy and research agenda. These developments reverse years of relative neglect for nutrition. Undernutrition is a global challenge with huge social and economic costs. It kills millions of young children annually, stunts growth, erodes child development, reduces the amount of schooling children attain, and increases the likelihood of their being poor as adults, if they survive. Stunting persists through a lifetime and beyond—underweight mothers are more likely to give birth to underweight children, perpetuating undernutrition across generations. Undernutrition reduces global gross domestic product by US\$1.4-\$2.1 trillion a year—the size of the total economy of Africa south of the Sahara.

Nepal in Transition Sebastian von Einsiedel,David M. Malone,Suman Pradhan,2012-03-12 This volume analyzes the context, dynamics and key players shaping Nepal's ongoing peace process.

Glycosyltransferases Inka Brockhausen,2013-06-14 Glycosyltransferases (GTs) are essential for the biosynthesis of complex glycoconjugates and are powerful tools to study the functions of complex glycans in health, development and disease. Complex glycoconjugates, such as glycoproteins, proteoglycans and glycolipids, are assembled by GTs which synthesize specific linkages between sugars or sugars and protein. This is in contrast to the non-specific or less specific chemical glycation reactions, transglycosylation and reverse glycosylation reactions. *Glycosyltransferases: Methods and Protocols* contains a wide range of studies, methods and protocols which form a solid basis for investigations of the role and mechanisms, biology and pathology involving GTs. Written in the successful *Methods in Molecular Biology*TM series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily

reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, *Glycosyltransferases: Methods and Protocols* is a vital contribution to glycobiology and glycopathology, and to applications of these enzymes in biotechnology and drug development. It will prove invaluable to students, postdoctoral fellows, and senior scientists carrying on research of GTs that has been intensified over the last years.

The Collapse of American Criminal Justice William J. Stuntz, 2011-09-30 Rule of law has vanished in America's criminal justice system. Prosecutors decide whom to punish; most accused never face a jury; policing is inconsistent; plea bargaining is rampant; and draconian sentencing fills prisons with mostly minority defendants. A leading criminal law scholar looks to history for the roots of these problems—and solutions.

The Scramble for China Robert Bickers, 2016-02-25 In the early nineteenth century China remained almost untouched by British and European powers - but as new technology started to change this balance, foreigners gathered like wolves around the weakening Qing Empire. Would the Chinese suffer the fate of much of the rest of the world, carved into pieces by Europeans? Or could they adapt rapidly enough to maintain their independence? This important and compelling book explains the roots of China's complex relationship with the West by illuminating a dramatic, colourful and sometimes shocking period of the country's history.

The UN Security Council in the Twenty-first Century Sebastian von Einsiedel, David Malone, Bruno Stagno Ugarte, 2016 After grappling for two decades with the realities of the post-Cold War era, the UN Security Council must now meet the challenges of a resurgence of great power rivalry. Reflecting this new environment, *The UN Security Council in the 21st Century* provides a comprehensive view of the council's internal dynamics, its role and relevance in world politics, and its performance in addressing today's major security challenges. David M. Malone is under-secretary-general of the United Nations and also rector of the UN University (UNU). Sebastian von Einsiedel is director of the UNU Center for Policy Research. Bruno Stagno Ugarte, most recently executive director of the Security Council Report, now serves as deputy executive director for advocacy at Human Rights Watch.

The Great Rebalancing Michael Pettis, 2014-10-26 How trade imbalances spurred on the global financial crisis and why we aren't out of trouble yet China's economic growth is sputtering, the Euro is under threat, and the United States is combating serious trade disadvantages. Another Great Depression? Not quite. Noted economist and China expert Michael Pettis argues instead that we are undergoing a critical rebalancing of the world economies. Debunking popular misconceptions, Pettis shows that severe trade imbalances spurred on the recent financial crisis and were the result of unfortunate policies that distorted the savings and consumption patterns of certain nations. Pettis examines the reasons behind these destabilizing policies, and he predicts severe economic dislocations that will have long-lasting effects. Demonstrating how economic policies can carry negative repercussions the world over, *The Great Rebalancing* sheds urgent

light on our globally linked economic future.

Fear of the Animal Planet Jason Hribal,2011-01-11 Taking the reader deep inside of the circus, the zoo, and similar operations, Fear of the Animal Planet provides a window into animal behavior: chimpanzees escape, elephants attack, orcas demand more food, and tigers refuse to perform. Indeed, these animals are rebelling with intent and purpose. They become true heroes and our understanding of them will never be the same.

Power System Planning Technologies and Applications: Concepts, Solutions and Management Elkarmi, Fawwaz,2012-02-29 This book focuses on the technical planning of power systems, taking into account technological evolutions in equipment as well as the economic, financial, and societal factors that drive supply and demand and have implications for technical planning at the micro level--Provided by publisher.

Making Sense of Chindia Jairam Ramesh,2005 Presenting an overview of current and future geopolitical interactions between India and China, this series of essays addresses the huge potential for trade and other forms of exchange that exists between the two countries. Essay topics address continuing security concerns, the issue of democracy in China, and the ongoing battle against HIV/AIDS in the context of two complementary, competitive, and fast-growing economies.

Priorities for Research to Reduce the Threat of Firearm-Related Violence National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Institute of Medicine,Executive Office, Institute of Medicine,Committee on Priorities for a Public Health Research Agenda to Reduce the Threat of Firearm-Related Violence,2013-10-03 In 2010, more than 105,000 people were injured or killed in the United States as the result of a firearm-related incident. Recent, highly publicized, tragic mass shootings in Newtown, CT; Aurora, CO; Oak Creek, WI; and Tucson, AZ, have sharpened the American public's interest in protecting our children and communities from the harmful effects of firearm violence. While many Americans legally use firearms for a variety of activities, fatal and nonfatal firearm violence poses a serious threat to public safety and welfare. In January 2013, President Barack Obama issued 23 executive orders directing federal agencies to improve knowledge of the causes of firearm violence, what might help prevent it, and how to minimize its burden on public health. One of these orders directed the Centers for Disease Control and Prevention (CDC) to, along with other federal agencies, immediately begin identifying the most pressing problems in firearm violence research. The CDC and the CDC Foundation asked the IOM, in collaboration with the National Research Council, to convene a committee tasked with developing a potential research agenda that focuses on the causes of, possible interventions to, and strategies to minimize the burden of firearm-related violence. Priorities for Research to Reduce the Threat of Firearm-Related Violence focuses on the characteristics of firearm violence, risk and protective factors, interventions and strategies, the impact of gun safety technology, and the influence of video games and other media.

Stumbling Giant Timothy Beardson,2013-05-21 “A thoughtful reconsideration of China’s actual place in the new world order, based on reality rather than fanciful speculation.” —Kirkus Reviews Can anything prevent China surpassing the United States and becoming the world’s top superpower? While predictions that China’s rise to global supremacy is a near-certainty have resulted in this belief becoming almost conventional wisdom, this book boldly counters such widely held assumptions. Investment strategist Timothy Beardson brings to light the daunting array of challenges that today confront China, as well as the inadequacy of the policy responses. Threats to China come on many fronts, Beardson shows, and by their number and sheer weight these problems will thwart any ambition to become the world’s “Number One power.” Drawing on extensive research and experience living and working in Asia over the last 35 years, the author spells out China’s situation: an inexorable demographic future of a shrinking labor force, relentless aging, extreme gender disparity, and even a falling population. Also, the nation faces social instability, a devastated environment, a predominantly low-tech economy with inadequate innovation, the absence of an effective welfare safety net, an ossified governance structure, and radical Islam lurking at the borders. Beardson’s nuanced, firsthand look at China acknowledges its historic achievements while tempering predictions of its imminent hegemony with a no-nonsense dose of reality.

Loggerhead Sea Turtles Alan B. Bolten,Blair E. Witherington,2022-03-01 Sea turtles have been the focus of research and intense conservation efforts for decades and the Loggerhead Sea Turtle, currently listed as a threatened species, is arguably one of the best studied of the seven species. Loggerhead Sea Turtles brings together, for the first time, international experts to synthesize the knowledge of Loggerhead biology and conservation and sets the stage for future ecological, biological, and conservation research. Highly detailed coverage includes diet, growth, nesting, migration, habitat

selection, and conservation.

Punctuation Mark Belinda Ellis, 2014-06-01 Mark reads at high speed. He pauses at a comma, star-jumps at an asterisk and leaps at an exclamation mark! He reads and reads until he reaches ... a full stop. Punctuation Mark is one in a series of delightful picture books about the joys - and the quirks - of language.
